

FEATURES:

- Economiser
- Voice/Voice
- Data/Voice
- Data/Data
- Use in Pairs
- Use with Patch Panels & Faceplates
- Instant Network Expansion

DESCRIPTION:

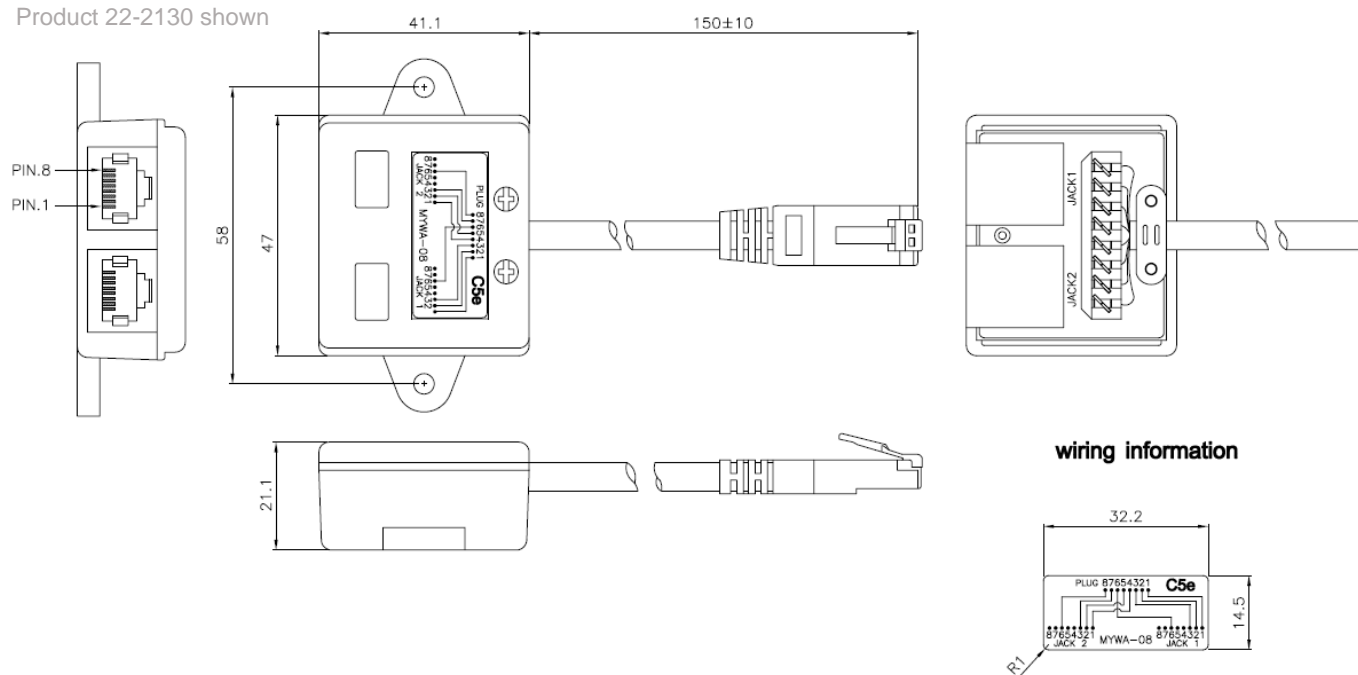

Enables an additional signal to be transmitted down the unused pairs of Cat5e twisted-pair cable
 Allows expansion of an existing system without the need to disrupt the cable infrastructure
 Used in pairs, one at each end of the cabling
 Provides for instant network expansion
 Although sold individually, the units must be used in pairs, with a device at either end of the cabling

PLEASE NOTE

These units must be used in pairs, with a device at either end of the cabling
 They are not suitable for telephones off broadband connections
 They MUST be used with patch panels & faceplates only.
