

FEATURES:

- USB 3.1c Male – RJ45 Adaptor
- Power Delivery Function
- Supports USB Type C and Gigabit Ethernet Port
- Supports 10/100/1000 Mbps Bandwidth
- 15cm Lead

DESCRIPTION:

The current trend of making laptops thinner now means that many of the connectivity options you are used to seeing have been replaced by a single USB Type C socket. Simply attached this unit to the USB Type C connector on the laptop and you will gain a Gigabit RJ45 (10/100/1000) socket and a USB Type C connector. Please note: The WPD port supports PD2.0, if your device or charger uses a different protocol the charging current will drop to 500mA or less.

SPECIFICATIONS:

No extra driver software is required, and auto driver installation
Supports twisted pair crossover detection and auto correction
