

FEATURES:

- HDMI Male – HDMI Male with USB Power
- Black PVC Cable
- Fully Moulded
- Available in 3 different lengths

DESCRIPTION:

The USB boosted HDMI cables provide a high-quality connection between devices due to the Oxygen Free Copper (OFC) construction. The cables are boosted by the addition of a USB connector (not required under normal use) to achieve a larger distribution of up to 50 metres. They support resolutions of 1080p for high quality picture, coupled together with 3D support, Audio Return Channel (ARC) and Ethernet channel. You can enjoy high quality movies with sound via your home theatre system while having access to the internet. Please note that due to the cable being actively boosted, it MUST be installed correctly in accordance with the input/output labelling (the output being connected to TV/Display etc.) This cable type offers the same basic performance as Standard HDMI Cable, it also benefits from having a dedicated data channel, known as the HDMI Ethernet Channel, for device networking. The HDMI Ethernet Channel functionality is only available if both link devices are HDMI Ethernet Channel (HEC) devices.

SPECIFICATIONS:

Supports resolution of 4Kx2K
USB connection for extra power
OFC Copper Cable
Actively Boosted
