## Product Description

Our LC - LC OM4 multimode fibre optic patch leads are typically used in 10, 40 and 100Gb/s applications, where high bandwidth requirements and transmission distances have shown a need for a higher performing multimode system. OM4 multimode fibre patch leads are backwards compatible with OM3.

All assemblies are fully tested during manufacturing and are supplied with test results. OM4 multimode patch leads are supplied with a strain relief boot and a 3.00mm aqua LSOH cable jacket as standard.

Non-stocked configurations (length, colour, connectors and cable type) can be manufactured to meet specific requirements - please contact our sales team for more information.
