

FEATURES

- Cat5e UTP Module LJ6C
- Low Profile Design
- Spring Loaded Shutter
- Supports up to 1G Ethernet
- Protected Labelling Facility
- The IDC Colour Codes Combine Two Wirings of T568A and T568B

DESCRIPTION

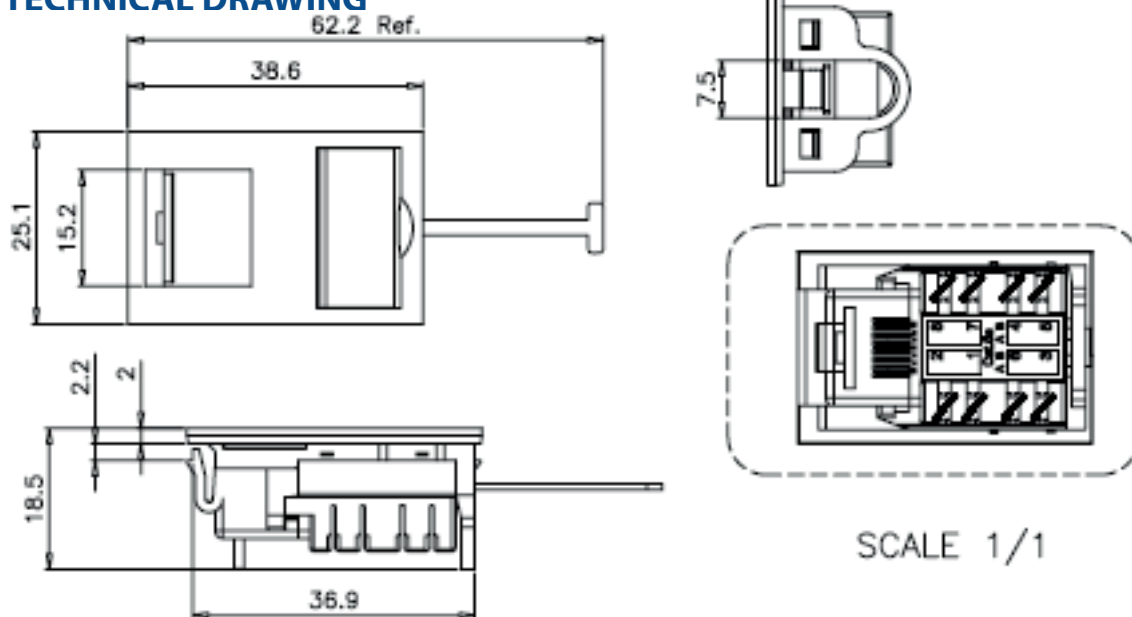

The Cat5e UTP LJ6C Module offers Cat5e performance and supports high speed protocols up to 1G Ethernet.

The low-profile design enables enhanced cable management in backboxes and multiple cable entry options to ensure optimum cable bend radii can be achieved.

There is a wire retention cap and there are multiple points for cable strain relief using the supplied cable tie.

The spring loaded shutter prevents contamination of the RJ45 contacts when the module is not in use. The module can be terminated with either Krone style or 110 punchdown tools and there is a protected labelling facility to provide clear outlet identification.
