FEATURES

- **Cat6 UTP Module**
- **Low Profile - Flat**
- **25mm x 50mm**
- **Spring Loaded Shutter**
- **Protected Labeling Facility**
- **Available in Black**

DESCRIPTION

The Cat6 UTP 25mm x 50mm Module offers Cat6 performance and supports high speed protocols up to 10G Ethernet.

The low-profile design (20mm overall depth) enables enhanced cable management in backboxes and multiple cable entry options ensures optimum cable bend radii can be achieved.

There is a wire retention cap and there are multiple points for cable strain relief using the supplied cable tie.

The spring-loaded shutter prevents contamination of the RJ45 contacts when the module is not in use.

The module can be terminated with either Krone style or 110 punchdown tools and there is a protected labelling facility to provide clear outlet identification.
