

FEATURES

- Cat6a Shielded Patch Panel
- 24 Port
- PCB Panel
- FTP
- 0.5u
- Supports High-Speed Protocols up to 10G Ethernet

DESCRIPTION

The Cat6a 24Port Shielded PCB 0.5u Patch Panel offers Cat6a compliant performance and supports high-speed protocols up to 10G Ethernet.

The panel is backwards compatible to all preceding cabling categories, ensuring support of all IP applications.

The 0.5u height maximises space in racks and cabinets and is ideal for 'top of rack' applications in data centers and large comms rooms.

The individual shuttered ports prevent contamination of contacts in unused ports, and the shutters can be easily removed if not required. The horizontal mounted PCB provides easy termination using either Krone style or 110 punch down tool and there are colour coded labels for both 568A and 568B wiring configurations. Cable screen termination clamps and an overall metal cover ensure protection from Electromagnetic Interference and a 400mm drain wire is supplied with the panel to provide a connection to the cabinet or rack earth bonding system.
