FEATURES

- OS2 LC APC - LC APC Fibre Leads
- Duplex Yellow
- Strain Relief Boot
- 2.00mm LSOH Cable Jacket
- Available in a Variety of Different Lengths
- Individual Test Results

DESCRIPTION

Cablenet LC APC - LC APC OS2 Singlemode Duplex Fibre Optic Patch Leads are used to connect networks over greater distances than multimode fibre.

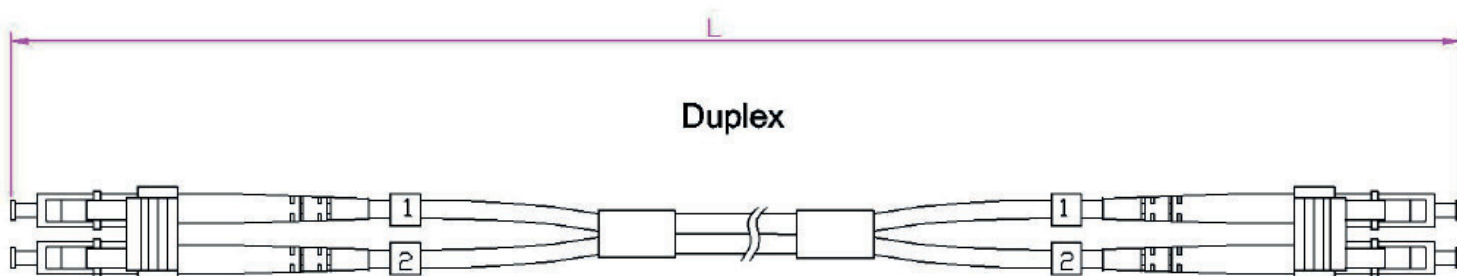

APC means Angled-Polish Connector. It is identified by the use of a green connector at the end of a fibre patch lead. The Angle-Polish prevents backreflections that can degrade the performance of fibre optic connections.

All assemblies are fully tested during manufacturing and are supplied with test results.

OS2 Singlemode Duplex Fibre Patch Leads are supplied with a strain relief boot and a 2.0mm yellow LSOH cable jacket as standard.

Non-stocked configurations (length, colour, connectors and cable type) can be manufactured to meet specific requirements - Please contact our sales team for more information.
