

FEATURES

- Fibre Cassettes available in BASE-8, 12, 16 & 24 configurations
- Available in Singlemode & Multimode
- Low-Loss MPO Connectors
- Easy Plug and Play
- Cassettes available in the following polarity options: Type A - Straight, Type B - Reversed and Type C - Flipped

DESCRIPTION

Our fibre cassettes are the building blocks of the high-density platform and are available in a wide range of configurations for multiple applications in BASE-8, BASE-12, BASE-16 and BASE-24 configurations. Each cassettes are pre-loaded with MPO/MTP adaptors and install easily from the front or rear of both our FPP-1000 and FPP-1002 panels. Each cassette independently mounts onto a sliding tray which allows access to individual connections while minimising disruption to other fibre connections.

Our Fibre Adaptor Plates are available in a wide range of fibre configurations. The most commonly used are the LC OM3/4 (Aqua) & LC OS2 (Blue) which are available in 6F Duplex or 12F Duplex configurations. All our Fibre Adaptor Plates can be used in either our 1U Fibre Panel (FPP-1000) or our 2U fibre Panel (FPP-1002)

OM3/4 (Aqua) 12F LC Duplex

OM3/4 (Aqua) 6F LC Duplex

OS2 (Blue) 12F LC Duplex

OS2 (Blue) 6F LC Duplex

6 Port MPO Adaptor Plate

6 Port SC Adaptor Plate

6 Port ST Adaptor Plate

6 Port FC Adaptor Plate
