

- MPO (F) to MPO (F) Trunk Cable
- CPR Cca Cca-s1a,d0,a1 Rated Cable
- BASE-16 Method B
- OS2 Singlemode (Yellow)
- Approved For Installation Into Any Public Sector Building, Compliant With The Most Stringent Fire Regulations
- Available In a Variety of Different Lengths

## Product Features

- Cca-s1a,d0,a1 rated cable
- OS2 Singlemode Yellow
- MPO (F) to MPO (F) BASE-16Trunk Cable
- Using MPO trunk and breakout cables allows much higher density cabling
- Approved for installation into any public sector building, and are compliant with the most stringent fire regulations.

## Product Description

Our MPO to MPO BASE-16 CPR Cca Trunk cables have a female MPO connector at each end of the cable and they are ideal for creating structured cabling system, including backbone and horizontal interconnections.

In a data centre environment with ever-increasing bandwidth and network connections, conventional duplex fibre leads are unable to meet these increased demands.

This is where MPO cables are the perfect solution. A single MPO connector can house up to 24 fibres in a form-factor that is very similar in size to a duplex LC connector.

Part Code	Description
MPO-16TC9MPO1	1m OS2 BASE-16 MPO (F) TO MPO (F) 16F Yellow CPR Cca Trunk Cable Method B
MPO-16TC9MPO2	2m OS2 BASE-16 MPO (F) TO MPO (F) 16F Yellow CPR Cca Trunk Cable Method B
MPO-16TC9MPO3	3m OS2 BASE-16 MPO (F) TO MPO (F) 16F Yellow CPR Cca Trunk Cable Method B
MPO-16TC9MPO5	5m OS2 BASE-16 MPO (F) TO MPO (F) 16F Yellow CPR Cca Trunk Cable Method B
MPO-16TC9MPO10	10m OS2 BASE-16 MPO (F) TO MPO (F) 16F Yellow CPR Cca Trunk Cable Method B
MPO-16TC9MPO20	20m OS2 BASE-16 MPO (F) TO MPO (F) 16F Yellow CPR Cca Trunk Cable Method B
