Product Overview:

The Maxxam XXTREME Cat5e U/UTP 4 pair Outdoor Unshielded Ethernet cable offers Cat5e standards compliant performance and supports high speed protocols up to 1G Ethernet.

The cable can be used externally between buildings and supports all the IP applications designed to run over Cat5e.

The U/UTP construction consists of eight colour coded 24AWG polyethylene insulated conductors which are twisted together into 4pairs.

The overall diameter of just 5.3mm enables tighter bend radii (just 24mm after installation) and facilitates the installation of more cables in a given size on containment.

Supplied in a 500m Reel.
